Abstract:

This paper is an attempt to find out the real need of living beings over the earth in addition to the needs already identified by the psychologist Mr. Maslow. The author has tried out with new model of Needs theory which is called as PP's BMS Needs Theory wherein he was trying to identify the comprehensive need for the living beings over the earth.

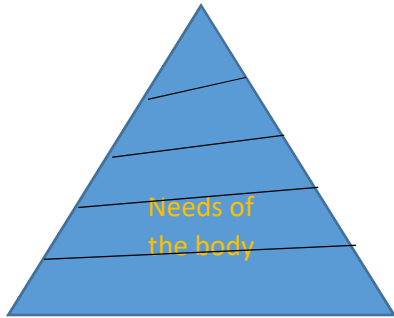

Key words: Needs Theory, Maslow 's Need Theory, Dr.PP's BMS Needs Theory. Need of living beings over the earth.

We have learnt Maslow's Need Hierarchy Theory, where we have studied, Five levels of need (Physiological or psychological, safety / social/ esteem/ self-actualization) which will satisfy human beings over the earth. To give full-fledged meaning to that theory or extension of what Maslow sir has said long time ago, this theory is given birth.

In human-beings this three layer of understanding is inevitable, though it has got 7 layers of body in nature.

1. Need of the body:

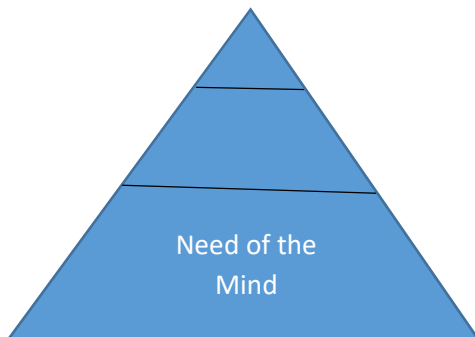

1.shelter 2.Food 3.Dress 4.Money 5.Fame

When it comes to body whatever Maslow sir has said would be highly appropriate and adoptable but for mind and soul, there is some lacuna out there for us to fill it up.

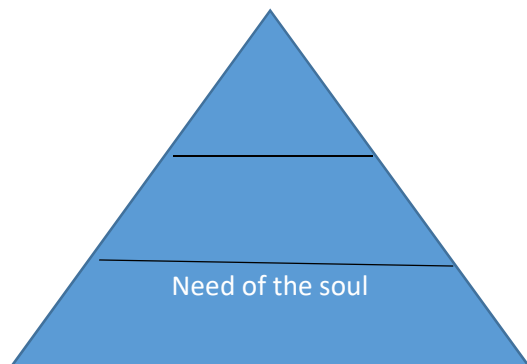

For example, when it comes to human body, 5 stages of need whatever Dr. Maslow has proposed was highly acceptable, what about mind and soul, which are inseparable nature of human body for which we need to feed about Wealth Health and Harmony.

2.Need of the Mind:

1.Wealth 2. Health 3. Harmony

3. Need of the Soul:

1.Non-re-birth/ re incarnation 2. RIP (Rest in Peace) 3.Live for-ever as a good soul.
